PROJECT DEVELOPMENT MANAGER

Description

Join our Team

Join Cloverleaf in developing innovative solutions for the largest electric loads. We develop power-ready and construction-ready sites to enable the growth of cloud computing and artificial intelligence, the renaissance of domestic manufacturing, and new forms of energy production.

We are a fast-paced company with experienced founders, strong investors, and a collaborative work environment. Take your career to the next level, make a difference, and work on some of the most important issues of our time!

Position Description

The Project Development Manager will drive the evaluation and development of identified sites to support data centers and other large electric users. The role will need to work cross-functionally, both internally as well as externally, with land agents, consultants, municipalities, and regulatory agencies. The Project Development Manager will be the internal owner of their specific projects with overall responsibility to deliver them to be pad-ready for construction.

The Land Development Program Manager will report to the Chief Development Officer and will be required to travel a minimum of 50% of the time.

Responsibilities

Responsibilities

As a Project Development Manager, you will need to collaborate internally and externally with a number of parties to drive successful execution of your projects. Key areas of responsibility and collaboration include:

1. Site Selection and Acquisition:

- Work with internal GIS teams to identify suitable locations for data center development.
- Manage local land agents to work on negotiation of exclusivity and access agreements for selected land parcels.
- Evaluate land parcels, considering infrastructure, zoning, and environmental factors. This will involve the management of external consulting firms.
- Negotiate land purchase and sale agreements for parcels approved for purchase and complete acquisition process.

2. Project Planning and Execution:

- Develop project plans, timelines, and budgets for land negotiations, due diligence, acquisition, and interconnection processes.
- Manage entitlements process through local agencies and execute development agreements as required to support project objectives.
- Coordinate site design, early works civil permitting, and civil/substation construction activities to deliver sites to pad ready.
- Ensure compliance with local regulations and industry standards through use of outside consultants.

3. Vendor Management:
